

VER-34

ROOM TEMPERATURE CONTROLLER

LARGE, CLEAR LED DISPLAY

BUILT IN TEMPERATURE SENSOR.

FRONT PANEL MADE OF GLASS

Room temperature controller in white colour (VER-34 White)

DEDICATED TO:

- wall and floor mounted LST convectors Caliente that are equipped with 24DC actuator valves

FEATURES OF CONTROLLER:

- large, clear led display
- built in temperature sensor
- hard touch buttons
- front panel made of glass
- automatic brightness adjustment on the base of built in light sensor

THIS CONTROLLER IS ONLY AVAILABLE IN THE SET:

- room temperature controller
- full glazed masking flap
- VERST24 actuator

VER-34 Controller will keep the adjusted temperature in the room, while releasing the shutdown signal to the valve being attached to the unit. The current room ambient temperature is being displayed on the screen.

The controller is attached always on the right side of the unit.

The controller requires the 24V DC current.

The regulator is an integral part of the radiator and must be included in the order.

Room temperature controller in black colour (VER-34 Black)
